

INFORMATION

OILAIID-NA-10

FLUOROBORIC ACID

DESCRIPTION

OILAIID-NA-10 is a primary component of Messina's Non-Corrosive Reactive System (NCRS) for removal of mud cake and associated damage to production formations.

APPLICATION

OILAIID-NA-10 flocculates the clays present within the mud cake, dislodging them and facilitating their removal.

OILAIID-NA-10 is non-damaging to tubular goods and works in a synergistic manner with the other components of NCRS to provide production increases without damage to downhole tubulars.

RECOMMENDED TREATMENT

OILAIID-NA-10 is utilized at a loading of 100 ppt in NCRS. See NCRS Product Data for further details.

HANDLING

In case of skin or eye contact, flush thoroughly with water.

PACKAGING

OILAIID-NA-10 is supplied in multi-ply 100 lb bags.

OILAIID-NA-10 is a Messina trademark
