

INFORMATION

KLEEN-BAR

BARIUM CARBONATE

DESCRIPTION

KLEEN-BAR is a multi-functional downwell chemical. It is used as a weighting agent in acidic completion and stimulation fluids. In addition, KLEEN-BAR is used to control (by precipitating) calcium and sulfate ions which could otherwise interfere with rheology.

Form	White powder
BaCO ₃	99.5%
Bulk Density	Approx 75 lb/ft ³ (packed)
Specific Gravity	4.3
Residue	325 Mesh 1.0%

HANDLING

Wear protective goggles and rubber gloves. Mandatory use of respirator is recommended. Store in dry place. Can be toxic upon ingestion.

PACKAGING

KLEEN-BAR is packaged in 50 lb multi-wall bags.

KLEEN-BAR is a Messina trademark
