

INFORMATION

KLEEN-BRIDGE

RESINOUS LOST CIRCULATION MATERIAL

DESCRIPTION

KLEEN-BRIDGE is a highly effective, oil-soluble product which provides excellent loss circulation control and bridging properties for many formations. It is available in fine, medium, and coarse grades.

Form	Light Yellow Powder
Solubility	Water Insoluble, Oil Soluble
Melting Point	180 °C
Bulk Density	1.89 gm/CL

APPLICATION

KLEEN-BRIDGE is an effective fluid loss additive and diverting agent for water-based fluids in oil, and/or condensate producing wells. KLEEN-BRIDGE should not be used in dry gas wells or in oil-based treating fluids due to the solubility of the product.

KLEEN-BRIDGE effectively lowers losses to both sands and fractures, and greatly reduces wall permeability.

RECOMMENDED TREATMENT

The loadings necessary will vary greatly depending on the type of treating fluid used and the rate of formation or fracture leakoff. A minimal loading would be 10-20 lbs/1000 gal treating fluid, and could possibly be used all the way up to 350 lbs/1000 gal of treating fluid.

PACKAGING

KLEEN-BRIDGE is packaged in 25 lb multi-wall bags with polyethylene liners.
