

INFORMATION

FOAMFREE-ALS

DEFOAMER

DESCRIPTION

FOAMFREE-ALS defoamer is a specially selected aluminum stearate which when mixed with diesel, exhibits excellent defoaming characteristics.

APPLICATION

FOAMFREE-ALS is recommended anywhere foaming is a problem and is widely used for this purpose.

RECOMMENDED TREATMENT

FOAMFREE-ALS should be mixed with diesel at the well site using approximately 1 part FOAMFREE-ALS to 20 parts diesel. The resulting mixture can then be broadcast over the mud pits to alleviate the foaming problem. Only small amounts of the mixture are necessary for good results.

PACKAGING

FOAMFREE-ALS is packaged in 25 lb or 25 kg multi-wall bags.

FOAMFREE-ALS is a Messina trademark
