

INFORMATION

FOAMFREE-TB

LIQUID DEFOAMER

DESCRIPTION

FOAMFREE-TB is a premium quality liquid antifoaming and defoaming agent for all types of oil well applications, including water-base drilling, cementing, stimulation, and completion fluids.

APPLICATION

FOAMFREE-TB will eliminate entrained gas or air from all water-based systems, and is stable to temperatures in excess of 200°F. FOAMFREE-TB is completely compatible with all commonly-used oilfield products.

RECOMMENDED TREATMENT

Recommendations for a mixing program should be made only after a complete project analysis has been made and a thorough study made of all the factors affecting the well site operation.

FOAMFREE-TB added in the concentration ranging from 1.0 to 1000 ppm will eliminate air in most systems. The minimum amount required is usually determined by observation and will depend upon the organics or saline content present.

HANDLING

Care should be taken in handling around open flames or sparks. Avoid contact with eyes, skin and clothing. In case of contact, immediately flush skin or eyes with plenty of fresh water for at least 15 minutes; for eyes, obtain medical attention.

PACKAGING

FOAMFREE-TB is normally available in export quality 5 U.S. gal pails or 55 U.S. gal steel drums.
