

INFORMATION

OIL AID-B-41

MICROBIOCIDE / PRESERVATIVE

DESCRIPTION

OIL AID-B-41 is an effective microbiocide in solid (powder) form. OIL AID-B-41 controls slime-forming bacteria and sulfate reducing bacteria in oilfield water systems and various types of oilfield fluids and slurries. OIL AID-B-41's relatively high activity and its solid form render the product very cost-effective while promoting ease and safety of handling.

APPLICATION

OIL AID-B-41 controls a broad spectrum of bacteria and fungi in aqueous drilling muds and in frac fluids systems, as well as workover/completion fluids and virtually any type of oilfield water processing or storage system.

PACKAGING

OIL AID-B-41 is packaged in plastic jugs containing 31.5 lbs (14.3 kg) net weight.

OIL AID-B-41 is a Messina trademark
